

Top margin 25mm

Left margin 20mm

affiliations, address9pt
abstract9pt
key words9pt

Please put the title in boldface and the affiliations should be in italics. The title, subtitle, authors' names, and affiliations (addresses) should be centered. The abstract and key words should be adjusted to the left and right margins. The abstract should be within 12 lines and the key words should be kept at 5-7 words and within 3 lines.

Please use asterisks to identify the author with the affiliation.

4. MAIN TEXT LAYOUT

The main text should be in two columns separated by a 6mm wide space. One column should be about 55 lines long. The font size for the main text should be in 10pt.

4.1 Headings (If they are longer than one line, please indent the second line as you see here.)

Up to three kinds of headings are allowed so the text should be organized accordingly.

4.1.1 Primary Headings

Please put the primary headings in 10pt boldface, capital letters. Leave one space after the identifying number (e.g. 4.) before typing the heading itself. Leave one line open (about 5mm) above and below the headings.

4.1.2 Secondary Headings

Please put the secondary headings in 10pt boldface. Leave one space after the identifying number before typing the heading itself. Leave one line open above the headings and no open space below.

4.1.3 Tertiary Headings

Please put the tertiary headings in 10pt boldface. Leave one space after the identifying number before typing the heading itself. There should be no open spaces either above or below the heading.

4.2 Equations and Mathematical Symbols

Please refer to the equations below for writing equations.

$$Z = \sin^2 \frac{\pi}{5} \sum_{n=1}^{\infty} \cos \frac{(2n-1)}{2} \pi + \int_0^{2\pi} (2 \sin \theta \cos \theta - 2\theta) d\theta \quad (1)$$

$$F_c = k^2 z^2 \left(\frac{\partial U}{\partial z} \right) \left(\frac{\partial p_c}{\partial z} \right) \left(\frac{K_c}{k_m} \phi_m^{-2} \right) \quad (2)$$

When referring to mathematical symbols in the text (e.g. F_c), please use the same font as the equation. Put equation number to the right, flush with the margin.

4.3 Figures and Tables

Please refer to **Table 1** and **Fig.1** for inserting tables

and figures.

4.3.1 Position of Figures and Tables

As a general rule, figures and tables should appear on the same page that they are first mentioned in the text. If there is not enough space to fit it on the same page then it is acceptable to insert it on the next page. Please do not put all the figures and tables together at the end of the paper. The width of the figure or table should be the same or wider than one of the columns of the main text. Please do not type in text on either side of the figures or tables. Leave one line open above and below each figure and table.

one line space between text and tables or figs

Table 1 Example of the table (If the caption is longer than one line, indent the following lines.) ← 8pt

Height (m)	A		B	
	Temperature (°C)	Humidity (%)	Temperature (°C)	Humidity (%)
0.5	15.3	76	16.3	74
1.0	14.7	73	15.2	72
1.5	14.5	72	14.7	70

Fig.1 Example of the figure ← 8pt

4.3.2 Captions and Font for Figures and Tables

Please use a font size of about 8pt in the figures and tables. The caption should be in 8pt as follows:

Fig + period + number + space + caption

Table + space + number + space + caption

Please type the captions as in **Fig.1** and **Table 1** with the number in boldface. Captions should be centered. If caption is long, go to the second line and indent as seen in **Table 1**.

4.4 Footnotes and Appendixes

Please avoid the use of footnotes*1 and appendixes. If it is necessary to use a footnote, put an asterisk and the number to the upper right of the place to be footnoted and enter the footnote at the bottom of the same column. If the contents are too long or have no direct relation to the

*1 The footnote number and the content should be in 9pt.

Right margin 20mm

about 55 lines

contents of that page. Then please enter it at the end of the paper in the appendix.

4.5 Reference

The text citation should consist of the author's name and year of publication, e.g., "according to Fast et al. (1996)" or "as has previously been noted (Maruyama et al., 1986; Nakano et al., 1992b)."

All references cited should be listed at the end of the paper in the reference section. Please put the heading **REFERENCES** in 9pt boldface. The list should be in 8pt and in alphabetical order by author's name. If there are several listings for the same author in the same year, then add a, b, c after the year of publication.

Please use the following format in making the reference list (be sure to indent two spaces on the lines after the first line).

Paper: "author (year of publication): title, name of journal (in italics), vol. number, page numbers (first and last)."

Book: "Author (year of publication): book's title, (in italics), publisher, number of pages."

Please leave one line open after the references section. In parentheses please note the dates when your manuscript was received and accepted and the sentence for receiving discussion and/or questions for public debate provided by the secretariat of JSIDRE. Please leave space for these dates until the secretariat of JSIDRE inform you of them.

5. CONCLUSION

If you have acknowledgments and/or and appendix, please put them at the end of the main text before the reference section. Acknowledgments should come before the appendix.

↑ one line space above the acknowledgment

ACKNOWLEDGMENTS : Leave one line open between the main text and the acknowledgments. The heading should be in 9pt boldface and the contents should begin on the same line in 9pt directly after the heading.

↑ one line space above the appendix

↓ 9pt Bold Capital

APPENDIX Instructions for the Appendix ← 9pt Bold

Leave one line space between acknowledgements and the appendix (or between the main text and the appendix if there are no acknowledgments). The heading **APPENDIX** should be in 9pt boldface followed by four blank spaces and then the subject heading in 9pt boldface. The contents should be directly under the heading in 9pt.

↑ one line space above the references

↓ 8pt
